Systems Engineer with over 8 years of experience in web application development, consistently demonstrating dedication and a passion for information technology. Currently seeking new challenges to continue professional growth and expand my knowledge and skills.

TECHNICAL SKILLS

Javascript	HTML5	LESS / SASS	Git / Github	TailwindCSS
Typescript	Php	React	Scrum	GraphQL
Node	Laravel	Redux	CI/CD	Next.js

EXPERIENCES

- Shokworks. inc**
Frontend Developer

Dallas City, United States
Dic 2019 – Jul 2023

 - I developed and maintained frontend interfaces, focusing on web layout, resolving style and functionality issues, and integrating APIs and endpoints.
 - I implemented UI/UX design requirements for various projects, primarily using technologies such as React.js and Redux.
- SB Medical**
Php Developer

Miami, United States
Jan 2019 – Jun 2019

 - I developed new content and modules to meet client specifications.
 - I maintained 13 e-commerce stores built with Magento 2, ensuring adherence to the development standards in place at that time. This included, among other tasks, updating store templates to implement a responsive design.
- Jida Desarrollos C.A.**
Php Developer

Caracas, Venezuela
May 2018 – Dic 2018

 - I maintained various web applications, ensuring compliance with client requirements while using a corporate framework based on PHP.
 - I developed multiple minimalist websites in WordPress, providing effective solutions for clients in need of a web portal.
- Movilnet**
Web Developer

Caracas, Venezuela
Apr 2017 – May 2018

 - I gathered and analyzed requirements to design information systems aimed at streamlining and automating the work processes of functional users in the Vice Presidency of Commercial Operations.
 - I maintained several applications used in the Virtual Channels Management, ensuring their functionality was updated and new requirements were met.
- Alcaldía del Municipio Libertador**
Web Developer

Caracas, Venezuela
Feb 2016 – Mar 2017

 - I maintained websites and web applications for the city hall, using PHP, HTML5, and JavaScript within an MVC architecture. This included implementing new functional user requirements and updating existing features.
 - I developed new web applications based on the requirements of various city hall departments, aimed at streamlining and automating their work processes.
